HQ LEAD NUMBER: FY16-144790-3709-CV

SUBJECT: Referred to Region - Michigan

FROM: (b) (6)

TO:

Name: (b) (6)

City: (b) (6)

State: Michigan

Zip: 48197

Alleged Violator's Name: Governor Snyder

Alleged Violator's Address: Ann Arbor, MI

Alleged Violator's City: Flint, MI

Alleged Violator's State: Michigan

Alleged Violator's Zip: 48501

Tip or Complaint: Today, while visiting Alpena, MI, my family swam at Mich-E-Kewis Beach on Lake Huron. The kids barely swam since it was cloudy and windy. When we got home after a windy day at the beach, their hair was completely tangle free and super soft. I grew up on that beach and have never experienced this before. It is my understanding that salt causes soft hair. There is much evidence that the MI Government has been salinating the Flint River for some time in addition to other unknown chemicals to cover up this water scandal. I think the EPA needs to start taking samples from all over MI as the entire ecosystem and Great Lakes could be affected. Strangely, the water in Alpena

(historically industrial area) appears to be much clearer than in the past. Normally it is clear north and South of Alpena, but murky in Alpena. That clear water is not a complaint, but a strange coincidence.

Specific Directions: US 23. In Alpena.

Violation Still Occurring? No

State DEP/DEQ/DEM Notified? No
